# Carbon Reduction Plan

Supplier name: ...Unisys Limited.....

Publication date: ...29<sup>th</sup> September, 2022.....

## Commitment to achieving Net Zero

Unisys Limited, a subsidiary of Unisys Corporation, is committed to achieving Net Zero emissions by 2030.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline Year: Year ending 31<sup>st</sup> December 2020</b>	
<b>Additional Details relating to the Baseline Emissions Calculations</b>	
<p><b>Unisys has no sources of Scope 1 Emissions</b> as our locations are in leased facilities with multiple tenants. We have no standby electrical generators that consume fuel and no vehicle fleet operations.</p> <p><b>Scope 2 Emissions</b> are calculated from actual utility meter readings. The applicable emission conversion factor is applied to determine greenhouse gas emissions.</p> <p><b>Scope 3 Emissions</b> during the baseline reporting year are based on Emissions associated with Business Travel and Employee Commuting. Emissions are calculated using source data in our corporate expense system, Concur. Reports are generated for all mileage claimed for business travel, and all business travel. This includes information provided by the airlines. Greenhouse gas emissions from travel are calculated by converting mileage figures using the applicable conversion factor to determine total fuel used and then applying the applicable emission conversion factor.</p>	
<b>BASELINE YEAR EMISSIONS</b>	<b>TOTAL (tCO<sub>2</sub>e)</b>
<b>Scope 1</b>	<b>0</b>
<b>Scope 2</b>	<b>1,261</b>
<b>Scope 3: Includes emissions associated with Business Related Travel and with Employee Commuting</b>	<b>276</b>
<b>Total Emissions</b>	<b>1,537</b>

## Current Emissions Reporting: Year ended December 31<sup>st</sup>, 2021

CURRENT YEAR EMISSIONS (2021)	TOTAL (tCO <sub>2</sub> e)
Scope 1	0
Scope 2	444
Scope 3: Includes emissions associated with Business Related Travel and with Employee Commuting	147
<b>Total Emissions</b>	<b>591</b>

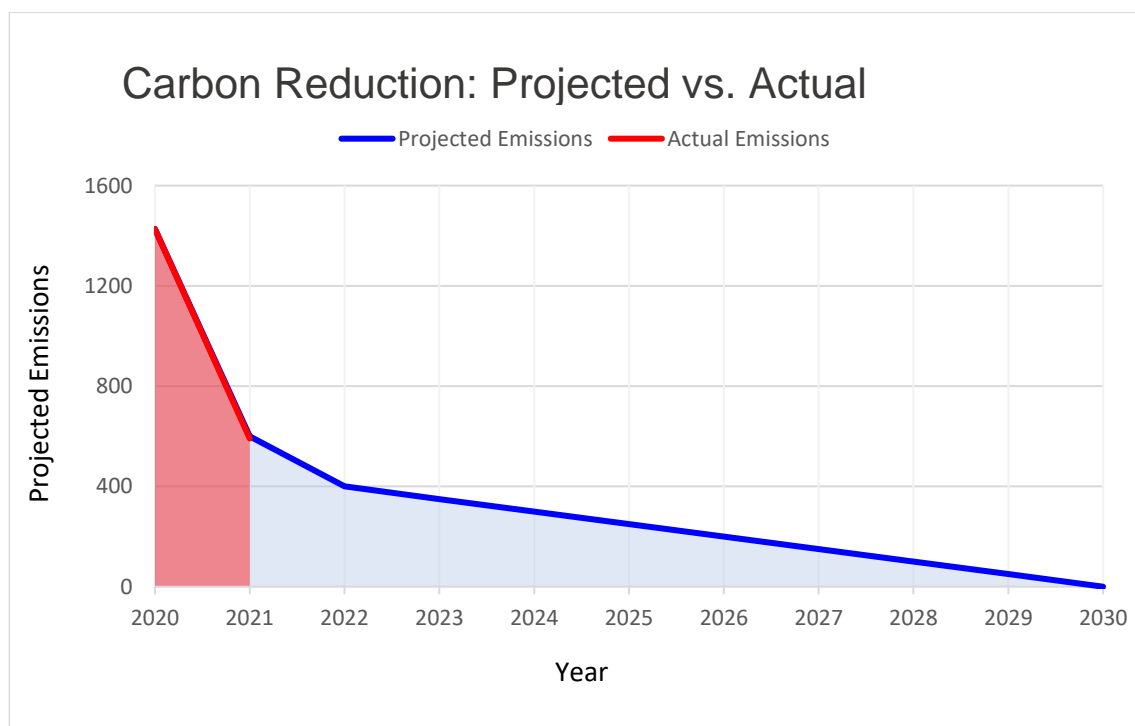

### Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to **306 tCO<sub>2</sub>e by 2025**. This is a reduction of **79%**

The target reduction is based on Scope 1, 2 and Scope 3 emissions that include Business Related Travel and Employee Commuting.

Progress against these targets can be seen in the graph below:

## Carbon Reduction Projects

We are committed to preserving the environment and have implemented a number of strategies to do this, both for our own business, our supply chain and by developing solutions for our customer base.

We adhere to all governmental environmental regulations and strive to go further and conduct business in a manner that respects the environment.

Specifically for our business, energy usage across our buildings is the largest contributor to our carbon footprint. Improvement measures include the following

- Consolidation of locations
- Implementing a flexible working policy and the rollout of collaboration tools including Microsoft Teams and Zoom to enable virtual meetings and reduce employee commuting.

The carbon emission reduction achieved by these schemes equate to **836 tCO<sub>2</sub>e**, a **59%** reduction against the **2020** baseline and the measures will be in effect when performing the contract.

In the future we hope to implement further measures such as evaluating the economics of purchasing renewable energy as well as offsetting carbon emissions with Renewable Energy Credits.

## Declaration and Sign Off

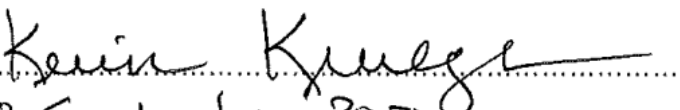

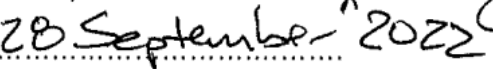

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>3</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
